

Contents

Introduction	<i>vii</i>
1: Algebra	1
1.1: Variables and Equations	2
Variables, Consecutive Integers, $d=rt$, Harmonic Mean, Moles Digging Holes.	
1.2: Linear Equations	10
Slope, Intercepts, Slope-Intercept Form, Point-Slope Form, Standard Form, Parallel/Perpendicular Lines, Horizontal and Vertical Lines.	
1.3: Systems of Equations	16
Substitution, Elimination, Common Word Problems, Cheating the System.	
1.4: Ratios, Proportions, and Percents	23
Ratios, Proportions, Percents, and Percent of Change.	
<i>Review 1.1 to 1.4</i>	30
1.5: Distribution	31
The Distributive Property, Difference of Squares and Perfect Squares, Sum of the Reciprocals.	
1.6: Quadratics	35
Perfect Squares, Difference of Squares, Factoring By Grouping, Solving Quadratics by Factoring, The Quadratic Formula, Word Problems, Sum and Product of the Roots.	
1.7: Exponents and Radicals	44
Multiplying, Dividing, Raising a Power to a Power, Fractional Exponents, Square Roots.	
1.8: Statistics	49
Mean, Median, Mode and Range.	
1.9: Sequences and Series	52
Arithmetic Sequences and Series, Geometric Sequences and Series.	
1.10: More Substitution	58
Nested Square Roots, Continued Fractions.	
<i>Chapter Review</i>	60

2: Counting	63
2.1: Basics	64
Simple Counting Techniques.	
2.2: Venn Diagrams	67
Two and Three-Set Venn Diagrams.	
2.3: Bowling Pins and Handshakes	70
Triangular Number Patterns.	
2.4: Counting Outcomes	73
The Fundamental Counting Principle.	
2.5: Casework	75
Keeping Organized.	
<i>Review 2.1 to 2.5</i>	77
2.6: Factorials and Permutations	78
Factorials, Permutations, Permutations with Restrictions.	
2.7: Combinations	84
Combinations, Paths on a Grid, Beyond Casework, Complementary Counting.	
<i>Review 2.1 to 2.7</i>	91
2.8: Sticks and Stones	93
With and Without Restrictions.	
2.9: Pascal's Triangle	97
Combinations and Pascal's Triangle.	
<i>Chapter Review</i>	100
 3: Probability	 103
3.1: Probability Basics	104
Compound Events, Dependent and Independent, Replacement, Cards.	
3.2: Compound Events and Counting	111
Combining Counting Techniques and Compound Probability.	
3.3: Casework and Probability	114
3.4: Probability and Combinations	116
3.5: Complementary Counting and Probability	118
<i>Review 3.1 to 3.5</i>	120
3.6: Geometric Probability	121
3.7: Expected Value	124
Finding the average outcome.	
<i>Chapter Review</i>	126

4: Number Theory	129
4.1: Primes and Divisibility	130
Sieve of Eratosthenes, Primes, Divisibility Rules.	
4.2: Factors	137
The Fundamental Theorem of Arithmetic, Factor Counting.	
4.3: Factor Tricks	143
Product of the Factors, Sum of the Factors, GCF and LCM, Factorials.	
<i>Review 2.1 to 2.5</i>	154
4.4: Different Bases	155
Notation, Basic Arithmetic.	
4.5: The Units Digit	159
Addition, Multiplication, Perfect Squares, Exponents.	
4.6: Fractions and Decimals	163
Repeating/Terminating, Conversions.	
4.7: Modular Arithmetic	167
<i>Chapter Review</i>	172
5: Geometry	175
5.1: Geometry Basics	176
Lines, Angles, Triangles, Polygons, Trapezoids, Parallelograms, Kites.	
5.2: Circles	185
Chords, Secants, Tangents, Arcs, Inscribed Angles, Properties, Circumference and Arc Length.	
5.3: Pythagorean Theorem	193
Triples, Special Right Triangles, Distance Formula, Algebra and the Pythagorean Theorem.	
5.4: Area	204
Formulas, Heron’s Formula, Altitudes, Working Backwards.	
5.5: Three-Dimensional Geometry	208
Polyhedra, Faces, Vertices, and Edges, Volume.	
5.6: Similarity	215
Right Triangles, Circles, Parallel Lines, Area and Volume Relationships.	
<i>Chapter Review</i>	226

Table of Contents

6: Solutions	229
Algebra	
Key.....	230
Solutions.....	232
Counting	
Key.....	260
Solutions.....	261
Probability	
Key.....	286
Solutions.....	287
Number Theory	
Key.....	306
Solutions.....	308
Geometry	
Key.....	332
Solutions.....	334
7: Appendix	361
Useful Lists and Formulas.
